Merit Expenses is an effortless online and mobile expense management system that could save your business thousands of pounds per year.

Simple. Scalable. Secure.

Developed in conjunction with several PLC organisations, Merit Expenses addresses the need for multiple approval chains across different teams.

As well as all the features you expect from an online expense management system such as receipt management, automatic mileage calculations and mobile support, the Merit Expenses system is truly innovative and scalable.

Merit Expenses is:

- Low cost
- Deployed in minutes
- Robust, stable and secure
- So simple to use you won't even need training

A system that can **grow**
with your business

If you are struggling to control the costs of expenses, or maybe you are concerned that some expenses are slipping through the net that shouldn't, then Merit Expenses can help you straight away.

"Merit Expenses was simple to setup and start using. The approval chains mean that we can assign multiple policies across people and departments with ease. Our staff can even submit expenses on the go without needing to be office based. We have already seen a significant return on investment".
